③ Add device

(1) Method 1: Open the mobile APP, click the "+" in the upper right corner to scan the QR code on the camera, and complete the device binding according to the guidance of the mobile phone.

(2) Method 2: Open the mobile APP, please click the "+" in the upper right corner and select the "QR code not found" button - one select "WiFi camera", and complete the device binding according to the guidance of the mobile phone.

Device sharing

Open permission of Device sharing, the person being shared can set the function of the device
If the permission is turned off, you can only watch the video, and cannot set the function.

FAQ

1. How do I invite family and friends to use my camera together?

A: Open the APP and select your camera in the home page. Click "Share" in the camera settings to enter the sharing page, and a QR code will be automatically generated. Your friends can open the app and gain some access by scanning the QR code in their phone.

2. Why doesn't the Wi-Fi name appear when I connect to Wi-Fi?

A: On Apple devices with iOS 13 and above, you need to turn on the "Location Permission" of the app in the system settings and change it to "Allow while in use".

3. Will the camera display a red light after turning on the night vision function?

A: The built-in IR LED lights, when the night vision is turned on, the camera only displays some faint red lights, but the picture quality is still clear in the dark environment.

4. What are the requirements for Wi-Fi?

A: Please use 2.4GHz wireless network. The device does not support 5GHz wireless networks. At the same time, please set the Wi-Fi authentication method to WPA2-PSK or other lower-level security methods, and need to set a password.

5. What should I do if the equipment fails?

A: Long press the power button to restart the camera. If there is no response, you can open the USB silicone cover at the bottom of the camera, long press the reset button to reset, and then long press the power button to restart the camera.

**6. How far should the camera be from the router?**

A: After testing, the Wi-Fi connection distance can normally reach 150 meters in an open area. But the actual situation depends on the strength of the Wi-Fi and its surroundings (thick walls, electromagnetic devices, large metal objects can all cause interference to the Wi-Fi signal). If the camera connection is weak or unstable, place the camera as close to the router as possible.

7. Can't add a camera for the first time?

A: When adding a camera for the first time, make sure the camera is powered on and the working status light is Blue flashes slowly. Or hear "Please use the App for WiFi configuration" from the camera.

1) Make sure the WiFi account and password are correct.
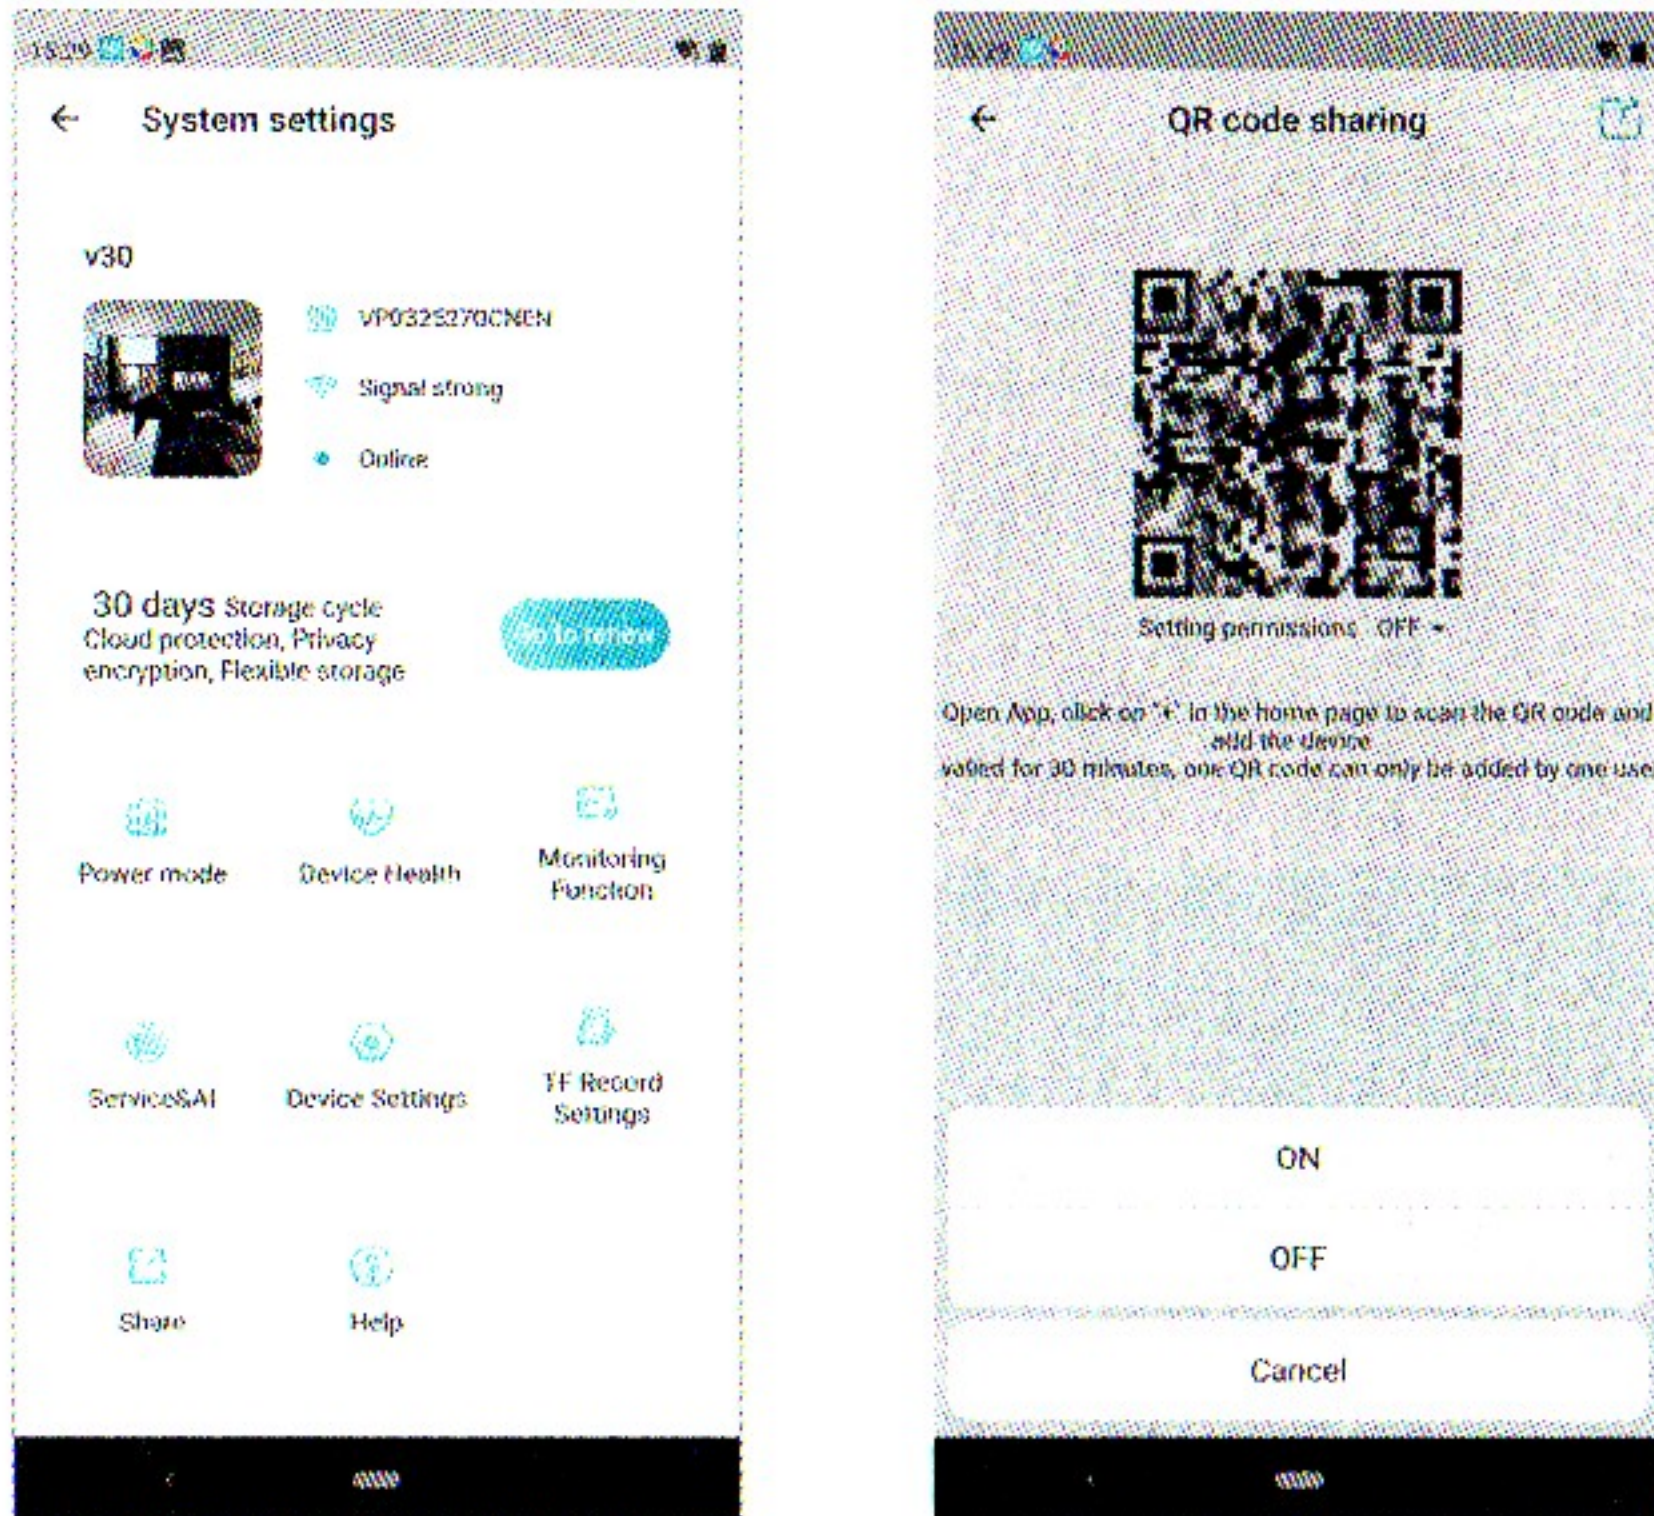

2) The camera only supports 2.4GHZ WiFi and does not support 5G frequency band. Please do not use 5G WiFi to configure the network.

3) When adding a camera, ensure that the network is smooth, and it is recommended to operate close to the router.

4) If the QR code network configuration is unsuccessful, try to use the AP network configuration (the mobile phone can be automatically added after connecting to the WiFi hotspot issued by the camera and returning to the App); the password should not be set as complicated as possible, and it does not contain special characters such as \'

5) If the two methods are still unable to connect to the Internet, it is recommended to restart the router and try again.
6) Provide the nameplate label of the router.

8. TF card not recognized?

A: After inserting the TF card into the TF card slot of the camera, check whether the capacity of the TF card is displayed in the "System Settings" - "TF Card Recording Settings" of the device in the APP. If it prompts "No TF card detected", it means that the TF card recognition failed.

1) Please use brand TF card.

2) The TF card can be recognized by the computer normally.

3) Only FAT32 format is supported.

4) The recommended TF card capacity is between 2-128G.

5) It is recommended to use a high-speed TF card of Class 4 and above.

6) Try to insert and unplug the TF card several times.

7) It is recommended to try another TF card.

8) It may take some time for the camera to recognize the TF card. After inserting the card, wait for about 30S before observing.

Battery Camera
Manual

Please read the Manual carefully before
using the product and keep it properly

Packing list

After opening the package, please confirm whether the
accessories are complete

- Battery Camera X1
- Data cable X1
- Screw Pack X1
- Base X1
- User Guide X1

Appearance

- Indicator
- Microphone
- Photosensitive indicator
- PIR

01

Product interface display

- TF card
- USB
- Switch
- Reset button
- Speaker

02

Charging Instructions

Connect the power interface and the power socket
with the power cord to charge the battery.

03
Installation guide

Choose a good location for your camera

Please install the camera in a position where the
field of view is not blocked, and ensure that the
camera is within the coverage of the Wi-Fi network.

04

2 Mounting bracket

Screw fixing

Use a drilling tool to drill holes in the wall according
to the hole spacing of the base. It is recommended
to use a pencil to mark the holes in the wall before
drilling. Screw the expansion nut into the hole on
the wall, and then connect the bracket with the nut
with screws to complete the fix.
05

3 Adjust the angle

Mount the camera on a magnetic stand and adjust
the monitoring angle.
06

Indicator light

Indicator light	Device status
Blue light flashes slowly	Waiting for network configuration
	Network configuration failed
Blue light always on	Network Configuration completed
Blue light flashes quickly	Disconnected from the network
