

TELECAMERA

SMART CAMERA

Quick Manual for Android and iOS

Packing list

After open packing list box, please check product body and accessories as below:

1

Interface

Before use, please pay attention to the interface and button of camera.

Note:
Reset button : Long press to restore the camera to factory settings.

2

Operation

1.Download APP

Tips one: Scan QR code.

Tips two: Search "iCSee" in the App store and download.

2.Power on

Use the power adapter to connect the camera power interface and the power socket, As shown in the figure below.

Note:

If you need local storage, please install the memory card firstly, then power on the device (the memory card does not support hot swapping, please plug and unplug the memory card when the device is powered off). Cloud storage is recommended, which is safe and convenient. Details See "Step 4" for operation.

3

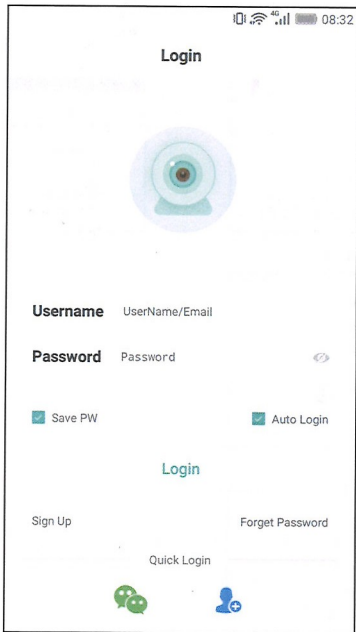

3.Camera configuration

1.Wireless network configuration:

01.User login

- Connect your phone to WiFi.
- Open the iCSee app, register an account and login(Figure 1).

Figure 1

4

02.Quick configuration

- After successful login, Click the "+" button (Figure 2).
- Click the "WiFi Camera" (Figure 3) .
- Set network configuration according to the camera's voice prompts and the APP interface step-by-step guide. When the camera emits a "Connect router successfully" prompt, it means that the camera has successfully configured the network.

Note: If the camera does not have a prompt sound for a long time, you can press and hold the camera Reset button until you hear the prompt " Restore factory settings, please do not power off "and release it to restore the camera to factory settings and then configure the network.
